Multi Port Passive POE injector

Power injector for 12 devices – 24 volts

WS-POE-12-1U-24v

IP VOIP phone, WiFi Access Points and cameras need from 3 to 15 watts each, with this injector, you can provide remote power up to 328 ft from the power source. If you have any question about the right power for your application, please ask us. If your device data sheet shows "48v 350ma" please see our 48v models. If the device shows "12v, PoE" on the data sheet – this usually means that the device uses 12v when powered from a transformer – and 48v when powered via CAT-5 – please see our 48v version. We can answer your questions if you are not sure.

- 12 Port Injector
 - 12 LAN
 - 12 LAN+POE ports
- Standard 1U high rack mount
- Provide power to any device on pins 45 and 78
- Use with any Ethernet switch
- Power for
